Introduction

HCI researcher and designer working at the intersection of human-AI interaction and AI-driven service design. Currently an HCI Research Scientist at TwelveLabs, with prior industry experience at Samsung Electronics and NAVER AI Lab. I earned my Ph.D. from KAIST, where my research explored how foundation models, including large language models and multimodal AI, can be meaningfully applied to real-world services in healthcare and mental wellbeing, with a focus on bridging academic research and real-world practice. I have published in top venues including CHI, CSCW, and DIS.
