Research Interests

As a researcher in **Human-Computer Interaction (HCI)** with a design background, I explore **human-centered AI interaction** design grounded on an in-depth understanding of people. Specifically, I focus on designing AI systems to support peoples' mental well-being. My research approach 1) designs a research artifact that enables exploration of human-AI interaction (HAI) design opportunities and 2) extracts empirical findings through in-the-wild study that enables an understanding of systems' impacts on people's behavior and cognition. I have presented my works at major conferences in the HCI field, including **ACM CHI, CSCW**, and **DIS**.

I investigated exploiting prediction algorithms and explainability that facilitate self-reflection for mental well-being (Accepted to the ACM CHI 2022 conference). Currently, my research focuses on exploring the role of **Large Language Models (LLM)** in fostering reflective behaviors among individuals. I am particularly interested in how LLM can be leveraged to support self-reflection and mental well-being.

Based on my strength in **mixed-method research** and **human-centered design**, I create artifacts, methodologies, and frameworks. My goal is to inspire meaningful and positive algorithmic experiences for HCI researchers and practitioners.

Keywords: Human-computer Interaction, User Experience Research, Human-centered Design, Human-AI interaction, Mental Well-being, Mental health, VR/AR, Autism, Social Computing,

Education

Sep. 2021 - Feb. 2024 (Expected)	KAIST , Department of Industrial Design Ph.D. student <i>Adviser</i> : Prof. Hwajung Hong
Sep. 2018 - Aug. 2021	Seoul National University , Interdisciplinary Program in Cognitive Science Ph.D. Candidate (*Transferred to KAIST) <i>Adviser</i> : Prof. Hwajung Hong
Mar. 2016 - Feb. 2018	Ulsan National Institute of Science and Technology , School of Creative Design Engineering M.E. in Creative Design Engineering Dissertation: Helping Friends Suffering Mental Health Issues: Challenges and Opportunities for Social support on Social Media from the Peer's Point of View <i>Adviser</i> : Prof. Hwajung Hong

Work Experience

Jan. 2023 - Jul. 2023	Research Intern at NAVER AI Lab (with Dr. Young-Ho Kim) Investigating the Efficacy of LLM-based Prompt Generation to Enhance Daily Reflection in Individuals with Depression

Research Project

Apr. 2023 - current **Research Assistant** | LG AI Research

Title: **Development of Interaction Design for Expert Knowledge Questions and Answering for Domain Experts and Techniques for Collecting High-Quality Data**

- **Designed a OA system** tailored for academic professionals involved in AI research, addressing user intentions, challenges, and providing interaction solutions.
- **Implemented a web-based prototype** of the interaction that aids AI-related tasks and assessed its usability.
- Conducted evaluations to measure the **efficiency of the system**.
- Explored strategies to extend the system's reach **for expert users across various disciplines**.

Jan. 2023 - Sep.2023 **Research Intern** | NAVER AI Lab

Title: **Investigating the Efficacy of LLM-based Prompt Generation to Enhance Daily Reflection in Individuals with Depression**

- **Developed an interactive mental health care system** utilizing a **Large Language Model (LLM)** to generate prompts for daily reflection in individuals with depression.
- Designed a **field deployment study** to evaluate the system's effectiveness and potential impact on mental health improvement.
- **Collaborated with a multidisciplinary team** to ensure the system's appropriateness for deployment in clinical settings, taking into account **ethical considerations** and user privacy.

June. 2020 - Feb. 2023 **Research Assistant** | Grant Agency: National Research Foundation of Korea

Title: **Development and Evaluation of an Adaptive Virtual Reality System to Enhance the Job-Related Social Skills of Adults with Developmental Disorders**

- Participated as a **remote visiting researcher at Georgia Tech** due to the Covid-19 pandemic.
- Designed an immersive and adaptive **Virtual Reality (VR) program** tailored to the needs of users on the **autism spectrum**, focusing on enhancing their social and job-related skills.
- Developed sensor **data-driven feedback models** to provide personalized, real-time guidance and support during VR training scenarios, fostering continuous improvement and engagement.
- **Collaborated with a multidisciplinary team** of researchers, clinicians, and educators to ensure the system's effectiveness and usability while adhering to best practices for working with individuals with developmental disorders.

Nov. 2017 - Dec. 2020 **Research Assistant** | Grant Agency: National Research Foundation of Korea

Title: **Developing fundamental techniques and design guidelines of persuasive interaction in a positive computing platform**

- **Designed a positive computing system** aimed at enhancing **mental health** and **productivity** through persuasive interaction techniques.
- Developed **experimental design strategies** and **implementation guidelines** to assess the effectiveness of persuasive interaction design services within the positive computing platform.

Mar. 2018 - Nov. 2020

Research Assistant | Grant Agency: National Research Foundation of Korea
 Title: **Toward Developing a Human-Centered Mental Healthcare Platform**

- Conducted **in-depth research on peer support interactions** in social media to identify opportunities for enhancing mental healthcare systems.
- Leveraged findings to design a mental healthcare system **utilizing a social media bot**, which facilitates user engagement and support.
- Collaborated with a multidisciplinary team to ensure the developed system was **human-centered, ethical**, and aligned with the needs of diverse user groups.

Teaching Experience

Sep. 2022 - Dec. 2022

Undergraduate Teaching Assistant | KAIST
 CS492(36.492): Smart Health: Data-Driven Service Design for Health and Wellbeing

Sep. 2019 - Dec. 2019

Undergraduate Teaching Assistant | Seoul National University
 2114.409 Creative Research Practice

Apr. 2018 - Mar. 2019

Assistant Researcher | Institute of Communication Research, Seoul National University

Awards

2015

Student Design Competition, Top4 | ACM CHI 2015

2015

UNIST Creative Design and Engineering Competition, Silver | UNIST

2014

Undergraduate Research Competition, Second Place | Handong Univ.

2014

Samsung Tomorrow Solution Award, Excellence award | SAMSUNG

Skills

Mixed Method User Research

Interview, Survey, Field deployment study, Contextual Inquiry,
 Grounded theory, Thematic analysis, Statistics (SPSS, R, Prism)

UX/UI Design, Fabrication

2D graphic and interface design: Adobe Illustrator, Photoshop, Premiere, Sketch, Figma
 3D modeling and fabrication: SIEMENS NX, Rhino, AutoCAD, 3D Printing, Laser cutting, Arduino

Programming

Python, JavaScript, React, React Native, SwiftUI, HTML & CSS
 Prompt engineering (for LLM)

Patents

Smart phone data-based intelligent stress prediction and management method
 US and Korea Patent application

Cardiopulmonary Resuscitation Plate for a First-aid Treatment
 Korea Patent No. 10-1628073

Academic Societies and Services

Peer Reviewing

Archives of Design Research (ADR) 2022, 2023 Paper
