## Research Interests

As a researcher in **Human-Computer Interaction (HCI)** with a design background, I delve into **Human-Centered AI Interaction design**, rooted in a profound understanding of people. Specifically, my work centers on designing AI systems that bolster people's **mental well-being**. I am proud to have showcased my work at esteemed HCI conferences such as ACM **CHI**, **CSCW**, and **DIS**. Recently, I examined the potential of prediction algorithms and their explainability in facilitating self-reflection for mental well-being (Accepted to the CHI 2022). Currently, I am exploring the role of the **Large language model** in promoting reflective behaviors among individuals to support mental well-being.

Based on my strength in **mixed-method research** and **human-centered design**, I create artifacts, methodologies, and frameworks. My goal is to inspire meaningful and positive algorithmic experiences for HCI researchers and practitioners.

Keywords: Human-computer Interaction, User Experience Research, Human-centered Design, Human-AI interaction, Mental Well-being, Mental health, VR/AR, Autism, Social Computing,

## Education

Sep. 2021 - Feb. 2024 (Expected)	<b>KAIST</b> , Department of Industrial Design Ph.D. student <i>Adviser</i> : Prof. Hwajung Hong
Sep. 2018 - Aug. 2021	<b>Seoul National University</b> , Interdisciplinary Program in Cognitive Science Ph.D. Candidate (Transferred to KAIST due to adviser's move) <i>Adviser</i> : Prof. Hwajung Hong
Mar. 2016 - Feb. 2018	<b>Ulsan National Institute of Science and Technology</b> , School of Creative Design Engineering M.E. in Creative Design Engineering Dissertation: Helping Friends Suffering Mental Health Issues: Challenges and Opportunities for Social support on Social Media from the Peer's Point of View <i>Adviser</i> : Prof. Hwajung Hong
Mar. 2011 - Feb. 2016	<b>Handong University</b> , School of Contents Convergence Design B.S. in Product Design

---

## Work Experience

Jan. 2023 - Jul. 2023	<b>Research Intern at NAVER AI Lab (with Dr. Young-Ho Kim)</b> Harnessing Large Language Model(LLM) in Real-world Clinical Settings: The Design, Deployment, and Discoveries of the MindfulDiary for Psychiatric Patients' Journaling
-----------------------	--

## Publications

### Conference papers /

## Research Project

Apr. 2023 - current

**Research Assistant | LG AI Research**

Title: **Development of Human-LLM Interaction Design for Expert Knowledge Questions and Answering for Domain Experts**

- **Designed a QA system** tailored for academic professionals involved in AI research, addressing user intentions and challenges and providing interaction solutions.
- **Implemented a web-based prototype** of the interaction that aids AI-related tasks and assessed its usability.
- Conducted evaluations to measure the **efficiency of the system**.
- Explored strategies to extend the system's reach **for expert users across various disciplines**.

Jan. 2023 - Sep. 2023

**Research Intern | NAVER AI LAB**

Title: **Harnessing Large Language Model(LLM) in Real-world Clinical Settings: The Design, Deployment, and Discoveries of the MindfulDiary for Psychiatric Patients' Journaling**

- **Developed an interactive mental health care system** utilizing a **Large Language Model (LLM)** to generate prompts for daily reflection in individuals with depression.
- Designed a **field deployment study** to evaluate the system's effectiveness and potential impact on mental health improvement.
- **Collaborated with a multidisciplinary team** to ensure the system's appropriateness for deployment in clinical settings, taking into account **ethical considerations** and user privacy.

June. 2020 - Feb. 2023

**Research Assistant | Grant Agency: National Research Foundation of Korea**

Title: **Development and Evaluation of an Adaptive Virtual Reality System to Enhance the Job-Related Social Skills of Adults with Developmental Disorders**

- Participated as a **remote visiting researcher at Georgia Tech** due to the COVID-19 pandemic.
- Designed an immersive and adaptive **Virtual Reality (VR) program** tailored to the needs of users on the **autism spectrum**, focusing on enhancing their social and job-related skills.
- Developed sensor **data-driven feedback models** to provide personalized, real-time guidance and support during VR training scenarios, fostering continuous improvement and engagement.
- **Collaborated with a multidisciplinary team** of researchers, clinicians, and educators to ensure the system's effectiveness and usability while adhering to best practices for working with individuals with developmental disorders.

Nov. 2017 - Dec. 2020

**Research Assistant | Grant Agency: National Research Foundation of Korea**

Title: **Developing fundamental techniques and design guidelines of persuasive interaction in a positive computing platform**

- **Designed a positive computing system** aimed at enhancing **mental health** and **productivity** through persuasive interaction techniques.
- Developed **experimental design strategies** and **implementation guidelines** to assess the effectiveness of persuasive interaction design services within the positive computing platform.

Mar. 2018 - Nov. 2020	<b>Research Assistant</b>   Grant Agency: National Research Foundation of Korea Title: <b>Toward Developing a Human-Centered Mental Healthcare Platform</b> <ul style="list-style-type: none"> <li>- Conducted <b><u>in-depth research on peer support interactions</u></b> in social media to identify opportunities for enhancing mental healthcare systems.</li> <li>- Leveraged findings to design a mental healthcare system <b><u>utilizing a social media bot</u></b>, which facilitates user engagement and support.</li> <li>- Collaborated with a multidisciplinary team to ensure the developed system was <b><u>human-centered, ethical</u></b>, and aligned with the needs of diverse user groups.</li> </ul>
-----------------------	---

---

## Teaching Experience

Sep. 2022 - Dec. 2022	<b>Undergraduate Teaching Assistant</b>   KAIST CS492(36.492): Smart Health: Data-Driven Service Design for Health and Wellbeing
Sep. 2019 - Dec. 2019	<b>Undergraduate Teaching Assistant</b>   Seoul National University 2114.409 Creative Research Practice
Apr. 2018 - Mar. 2019	<b>Assistant Researcher</b>   Institute of Communication Research, Seoul National University

---

## Talks & Panels

Jul. 2023	<b>Design for Mental Wellbeing: Exploring the Role of Artificial Intelligence for Self-reflection</b> HAI LAB at Seoul National University of Science and Technology
Jun. 2023	<b>Exploring Opportunities for Generative AI to Improve Mental Health</b> NAVER UX Designer Workshop
Jan. 2023	<b>Exploring the Role of Large Language Models in Retrospective Writing</b> NAVER Tech Talk

---

## Awards

2015	<b>Student Design Competition, Top4</b>   ACM CHI 2015
2015	<b>UNIST Creative Design and Engineering Competition, Silver</b>   UNIST
2014	<b>Undergraduate Research Competition, Second Place</b>   Handong Univ.
2014	<b>Samsung Tomorrow Solution Award, Excellence award</b>   SAMSUNG

---

## Skills

### Mixed Method User Research

Interview, Survey, Field deployment study, Contextual Inquiry, Grounded theory, Thematic analysis, Statistics (SPSS, R, Prism)

### Programming

Python, JavaScript, React, React Native, SwiftUI, HTML & CSS  
 Prompt engineering (for LLM)

### UX/UI Design, Fabrication

2D graphic and interface design: Adobe Illustrator, Photoshop, Premiere, Sketch, Figma  
3D modeling and fabrication: SIEMENS NX, Rhino, AutoCAD, 3D Printing, Laser cutting, Arduino

---

## Patents

### **Smart phone data-based intelligent stress prediction and management method**

US and Korean patent application

### **Cardiopulmonary Resuscitation Plate for a First-aid Treatment**

Korea Patent No. 10-1628073

### **AR simulator**

Korea Design Protection No. 30-0938066

---

## Academic Societies and Services

### **Peer Reviewing**

ACM CHI 2023, 2024 Paper

ACM TEI 2018 Paper

Archives of Design Research (ADR) 2022, 2023 Paper

IASDR 2021 Paper
